ARS. G. NICHOLAS invites the attention of her accessomers and others to ber newly-invented Ventratis Diamon Wiss. These Wigs were invented by Richard Beck, of London, and made by one of the settlemen in my easibilitimant, who took the highest premium for the best Wigs on exhibition at the industrial Exhibition, London, in 1851. They are warranted souto shrink; (those who have worn Wigs know that the greatest comfort in a Wig is in one that will no shrink ar act,) besides, they are so close a resemblance to nature as to defy detection—and to making settlemento see the effect, a large assertment is kept on hand for inspection, any of which, if approved of, saves the

oellence of a well-made quil peu la acknewledged by ai, but few are neare that the came is that it bende laterally at the point in making strong abades, and becomes an oblique peu.
